

# RELOOP MIXTOUR

## SLEEK & POWERFUL MIX CONTROLLER WITH AUDIO-INTERFACE

*Muenster, Germany - 20<sup>th</sup> January 2016*

Dear press partner,

we are happy to announce to you today our newest addition to the Reloop Controller line-up: MIXTOUR – a compact hybrid controller for iOS, Android & Mac.

The Reloop MIXTOUR is a portable cross-platform DJ controller designed for use with the award winning DJAY2 app from Algoriddim.

*Gerald Barbyer, Product Manager Reloop:*

"We are excited to announce this smart & sleek mix controller together with Algoriddim", comments Gerald Barbyer, Product Manager at Reloop. "It's small in size and big in features: The 'Ready-2-Mix' hardware with Audio-Interface includes all necessary controls as Transport, Hot Cue, Looping and FX - so you don't need any other gear to get your party on anytime, anywhere."

*Kariim Morsey, CEO Algoriddim:*

"We're delighted to team up with Reloop for MIXTOUR, the most portable hardware solution for djay yet", said Karim Morsy, CEO of Algoriddim. "Its layout is perfectly tailored for djay 2 and djay Pro across desktop and mobile devices making it an ideal solution to mix on-the-go using high-quality tactile controls."

## **RELOOP MIXTOUR**

MIXTOUR has been designed from the ground-up to offer a compact, two-channel DJ controller which allows you to get the party started anywhere, anytime. Through close cooperation with Algoriddim, we've been able to develop a fully integrated device that fuses vital mixer functions with a transport and remix section. Whether you're using iOS, Android, PC\*\* or Mac – with Reloop MIXTOUR everything is possible.

The trigger modes: Transport and cue points for full control!

The Reloop MIXTOUR's pad section comes packed with functions. The transport mode includes Play, Cue, Sync and Auto-Loop controls.

In Cue mode it is possible to set, store and trigger up to 4 cue points. By entering shift mode you can also set grids or change loop lengths with the same controls.

The rubberized trigger pads used for the transport controls are not only highly tactile, but they're also lit by two-colour LEDs, indicating which mode is active so you're never confused in the mix.

Channel-Strip with Clubmixer-Design

The strong, durable, full-size control knobs and 45mm Pro-Faders are set out in the same way as a

class-leading club mixer. The three-band EQ, gain trim pots, bipolar filters and VU meter (switchable between master and pre-fader) ensure you have everything you need to perform. All controls have been rigorously tested to ensure a high-quality performance every time you play, and the whole MIXTOUR carries with it a sense of solidity and reliability.

**Track Management – Good navigation is half the mix!**

The unique Reloop Trax-Encoder not only catches the eye, as it also gives convenient and comfortable control over your music library. We've also added a ‚Seek‘ option to the Push-Encoder, allowing you to detect and navigate to a specific position of the selected track. The full-size load buttons can be used to navigate through the library tabs by selecting the shift layer. This enables a quick search for certain artists or titles.

Another innovative new feature is the ability to manage a Queue mode, which allows you to pre-listen to your next tracks. This function makes navigating huge Spotify\* and iTunes track lists far easier.

**Micro look – Macro usability!**

The next special feature of Reloop MIXTOUR is the Macro-FX mode. This feature allows you to combine the FX and filter sections by pushing the FX-button, or you can set an effect by pushing the Shift- and FX-button at the same time. Now it's possible to conveniently combine a Delay and a High/Low-Pass filter at the same time – micro look, macro usability!

**Powerful Interface**

An amazing club-ready sound with low latency and low-noise playback best describe the integrated interface.

**MIDI-support for all operating systems!**

As the Reloop MIXTOUR is fully MIDI-mappable, any MIDI-capable software, like Traktor or Virtual DJ, can be easily controlled. Purpose-designed mapping files will be available to download soon.

Mix more than 20 million tracks with Spotify & DJAY 2!

The world-famous streaming service Spotify has been part of the DJAY program since version 2.5. That means you can get direct access to millions of tracks and mix them on the fly as if they were all already on your iPad!\* Your favorite artist, latest charts of your preferred genre or prepared playlists: they're all available to you!

Spotify and DJAY2 takes away the need for you to store huge music libraries on your device. Spotify is also equipped with an innovative Match- & Mixsystem which analyzes each track's genre, BPM and pitch and through the compiled data is able to suggest the next track for your mix!

\*Please note: You need a Premium-membership of DJAY for Spotify-access. A 7-day trial of Spotify-premium is available for all DJAY 2 users.

\*\*Please note, for PC: ASIO-drivers available for download, mapping for Traktor and Virtual DJ is required.
